Fold 1
Fold 2
Fold 3
(a) Recall sensitivity across temporal windows
PaySim (PTHW − P0) | c = 100
Recall difference (pp)
Validation alert cap (%)
IEEE-CIS (M2 − M0) | raw scores
Recall difference (pp)
Exact Test budget (%)
(b) Cost sensitivity under asymmetric loss
PaySim (PTHW − P0) | Validation cap = 3%
Cost reduction (%)
False-negative cost c (log scale)
(c) Detection versus review capacity
PaySim (PTHW) | exact budgets | Platt scores
Recall@K (%)
Exact Test review capacity (%)
(d) PaySim Test alert rate
PTHW
P0
Validation cap
c = 100
Test alert rate (%)
Validation cap (%)
False-negative cost
Validation cap = 3%
Test alert rate (%)
c (log scale)
(e) Reference recall effects
95% CI · separate scales
